## ERASMUS+ Capacity Building in the Field of Higher Education (CBHE) Developing services for Individuals with Disabilities [DECIDE] Project Kick-Off Meeting

May 27th, 2019

Place: Almaty, Republic of Kazakhstan

Dates: 10th-13th February 2019

# KICKOFF MEETING

- **The kick off meeting** took place in KAZNU Library, Almaty, at 71, Al – Farabi av., Almaty, on Monday 11<sup>th</sup> and Tuesday 12<sup>th</sup> of February 2019.
- After the welcoming message from the host, Al Farabi Kazakh National University, all the participants discussed the CBHE project 598661 main objectives and made a schedule for the next activities.
- The financial rules for the CBHE projects as outlined in the *Guidelines for the use of the Grant* the Work Plan for DECIDE Project were presented.
- The WP Leaders explained thoroughly their role, the planning of the upcoming activities and focused on the deliverables' due importance.
- We decided the locations of the next meetings, ESP meeting, to take place in Dresden, from March 24<sup>th</sup> to March 30<sup>th</sup>, 2019, Modules training, to take place in Limerick, from July 22<sup>nd</sup> to August 2<sup>nd</sup>, 2019, PMC meeting to take place in London, from November 13<sup>th</sup> to November 15<sup>th</sup>, 2019.
- Teams of Quality Assurance were organized in every institute, as well as Country Leaders to coordinate things in their country as a group.
- The importance of dissemination and sustainability of the project was discussed.
- All important matters concerning the deliverables, the dates outlined in the Work Plan for DECIDE Project were discussed.
- The channels for efficient communication were established: Google Drive space, WhatsApp group, Skype group. Concerns about compliance with relevant GDPR provisions and regulations were expressed.

# DECIDE CURRICULUM TRAINING

## THE DELIVERABLE 1.3.-PREPARATION OF DECIDE TRAINING PROGRAMME MODULES 2-8 – WAS ACHIEVED.

The following courses were held with the purpose to teach the future trainers:

- Module 1: English for Specific Purposes (Special Needs and Disability) training
  - Module 2: Marketing - Introduction to Theory and Practice
  - Module 3: Use the Library: Access to Libraries for people with Special needs and disability  
Module 3: Use the Library: Information Literacy and Academic Writing
  - Module 4: Access Liaison Officer Training Programme
  - Module 5 Meeting Needs - Cognition and Learning (including moderate and severe
  - Module 6: Meeting Needs - Communication and Interaction
  - Module 7 Meeting Needs - Physical and Sensory Needs
  - Module 8 - Meeting Needs - Social, Emotional and Behavioural Difficulties
- Beside courses, the participants were involved in work groups, developing some ideas for creating National Awareness Campaign, they received new materials, designed by TUD, to keep teachers' records. The feasibility of the curricular adaptation models to specific, national contexts were discussed, each team presented the plans for National Awareness Day.
  - The teams discussed the implementation of the modules, in each university; new groups were constituted for the preparation of modules for teachers from partner countries. Each group has a leader in EU countries that held the course. New communication path were establish, for specific groups.
  - The project members were encouraged to distribute photos on social networks (Facebook and twitter).
  - The most relevant materials were uploaded on project site.

## **Module Description**

**Module Title:** Meeting Needs - Communication and Interaction

This module includes a focus on Autism as identified by the SWOT analysis carried out in the project.

**The aim of Meeting Needs - Communication and Interaction module** is to be aware of the impact of curricular adaptation on the inclusion of people with SEND into higher education. During this module, we will critically analyse communication and interaction strategies that are considered to be effective for higher education. We will evaluate the feasibility of the curricular adaptation models to specific, national contexts.

**The discipline** “Meeting Needs - Communication and Interaction” is intended for students with disabilities in higher educational institutions.

5.7	Financial and Accountability Audit						X	

Dear Pia,

Thank you very much for the feedback on field monitoring visits and for recommendation. It is very helpful in our effort to achieve the best project implementation.

I have shared your email with all project partners and we have already taken some collaborative actions in response to the findings. We have carefully considered all the notes and recommendations and have already proceeded with the required actions. Please note that for many of the points mentioned in the recommendations we had already taken some actions since as you already mentioned the field monitoring visits took place in the first stage of the project.

- Delays in the implementation of project activities were mainly caused by the delay with which the pre-financing was transferred. However, during the first months the preparatory stages have been completed.
- The Dresden and Limerick staff trainings were very good, as sufficient language skills in English are a prerequisite to participate in and meet the project goals successfully. All participants were/ are in need of familiarization with advanced English for Specific Purposes language and vocabulary in the area of disability and inclusion, and a number of them also required further basic language skills training in English. Thus, training in these areas at both TUD and LIT took place. Materials and guidance for on-going self-help and learning activities have been provided and uploaded on the website: <http://www.decideproject.ie/activities/>

The feedback of training was positive, see <http://www.decideproject.ie/wp-content/uploads/2019/08/Limerick-training-feedback-survey-results.pdf> and <http://www.decideproject.ie/wp-content/uploads/2019/05/Dresden-training-survey-satisfaction-results.pdf>

- The Development of the on-line platform and guidelines for population of the site were delayed due to the need to identify appropriate technical solutions, but also to prepare the informational content by the partners.

It should be mentioned that, within the project, the online platform and the website of the project represent two totally different elements. Among the objectives of the project is the creation of an online platform, which will include a virtual library with materials related to people with disabilities and inclusion, as well as a cloud – based e-learning software, available online. Through the online platform, dissemination of knowledge and training of persons from institutions and NGOs from Partner Countries will be ensured.

The online platform will be a typical knowledge management system that delivers the facility for organisation to build, share, interchange and reuse knowledge, and it will be kept active throughout the sustainability of the project. It allows access to multiple user roles. Contents in the platform are dynamic and changed frequently. The visibility of one content changes from person to person which means a content could be unique to a user based on group member settings. Contents are collected from the different and diverse sources, according to the original project submission.

The project website, which is currently functional, will be integrated as a sub-domain of the portal.

# NEO FEEDBACK

- The Work Plan has been updated and posted on the project website.

<http://www.decideproject.ie/about/workplan/>

- Currently, the management of the project is oriented towards improving the communication with the partners from the Partner Countries and ensuring a good understanding of the objectives and activities of the project by these partners. The results of survey regarding progress of the project from June can be see at [http://www.decideproject.ie/wp-content/uploads/2019/09/DECIDE-progress-survey-results\\_July-2019.pdf](http://www.decideproject.ie/wp-content/uploads/2019/09/DECIDE-progress-survey-results_July-2019.pdf)

However, after considering the recommendations and findings of the monitoring teams, which we consider particularly useful, the management team take action to the following measures:

1. The work plan, which has been updated, <http://www.decideproject.ie/about/workplan/>, we updated also work package deliverables <http://www.decideproject.ie/wp-content/uploads/2019/09/DECIDE-WorkPackages-Deliverables-2019-05-05.pdf>
2. The partners from the partner countries have been recommended to compose the teams in order to ensure that necessary competencies and capacities, in accordance with the objectives of the project and with the specific needs of each partner country and they agreed. However, the decision upon the composition of the teams belongs to each institution.
3. The Dissemination and Exploitation Plan, drafted in June 2019 and sent to all partners, [http://www.decideproject.ie/wp-content/uploads/2019/09/DECIDE-598661-Dissemination-exploitation-plan-DRAFT\\_ON-PROGRESS.pdf](http://www.decideproject.ie/wp-content/uploads/2019/09/DECIDE-598661-Dissemination-exploitation-plan-DRAFT_ON-PROGRESS.pdf) will be finalised and communicated to all partners at the November 2019 meeting in London. Emphasis will be placed on the dissemination of results at local and national level. Also, the measures proposed by the respective plan will be included in the work plan. Deadline: November 2019.

4. A more detailed version of the Quality Plan will be edited and provided for discussion at the meeting in London. The Plan will be designed to address practical issues of inclusion as well as attitudes of staff and fellow students. It will also be used to analyse the way in which the project can have a positive legacy with respect to inclusion.
5. A Project Management Guide will be drafted and distributed to all partners at the November 2019 meeting in London. The Project Management Guide will also contain the modalities of implementing the present recommendations.
6. Cooperation will be pursued by partners from the non-academic sector, especially NGOs with relevant experience and expertise in the field. They will be encouraged to post content on the project's online platform, to facilitate the exchange of best practices. In this respect, an organization from Uzbekistan has already been contacted, and this will post the materials developed in another project, on the online platform, it will be synergies with all projects and associations in the field.
7. The involvement of students with disabilities in the project will be pursued and encouraged. However, the dissemination of information regarding these students will be carried out only with their consent, in the context of the GDPR Regulation.
